

Introduction to Solid Modelling using Solidworks

GALGOTIAS
UNIVERSITY

Learning Objectives

- *Understand the need of the sketching environment.*
- *Open a new part document.*
- *Understand various terms used in the sketching environment.*
- *Use various sketching tools.*
- *Use the drawing display tools.*
- *Delete sketched entities.*

THE SKETCHING ENVIRONMENT

A sketch is defined as the basic contour for the feature

Figure 1 Solid model of a Spanner

Figure 2 Base feature of the Spanner

Figure 3 Sketch for the base feature of the Spanner

THE SKETCHING ENVIRONMENT

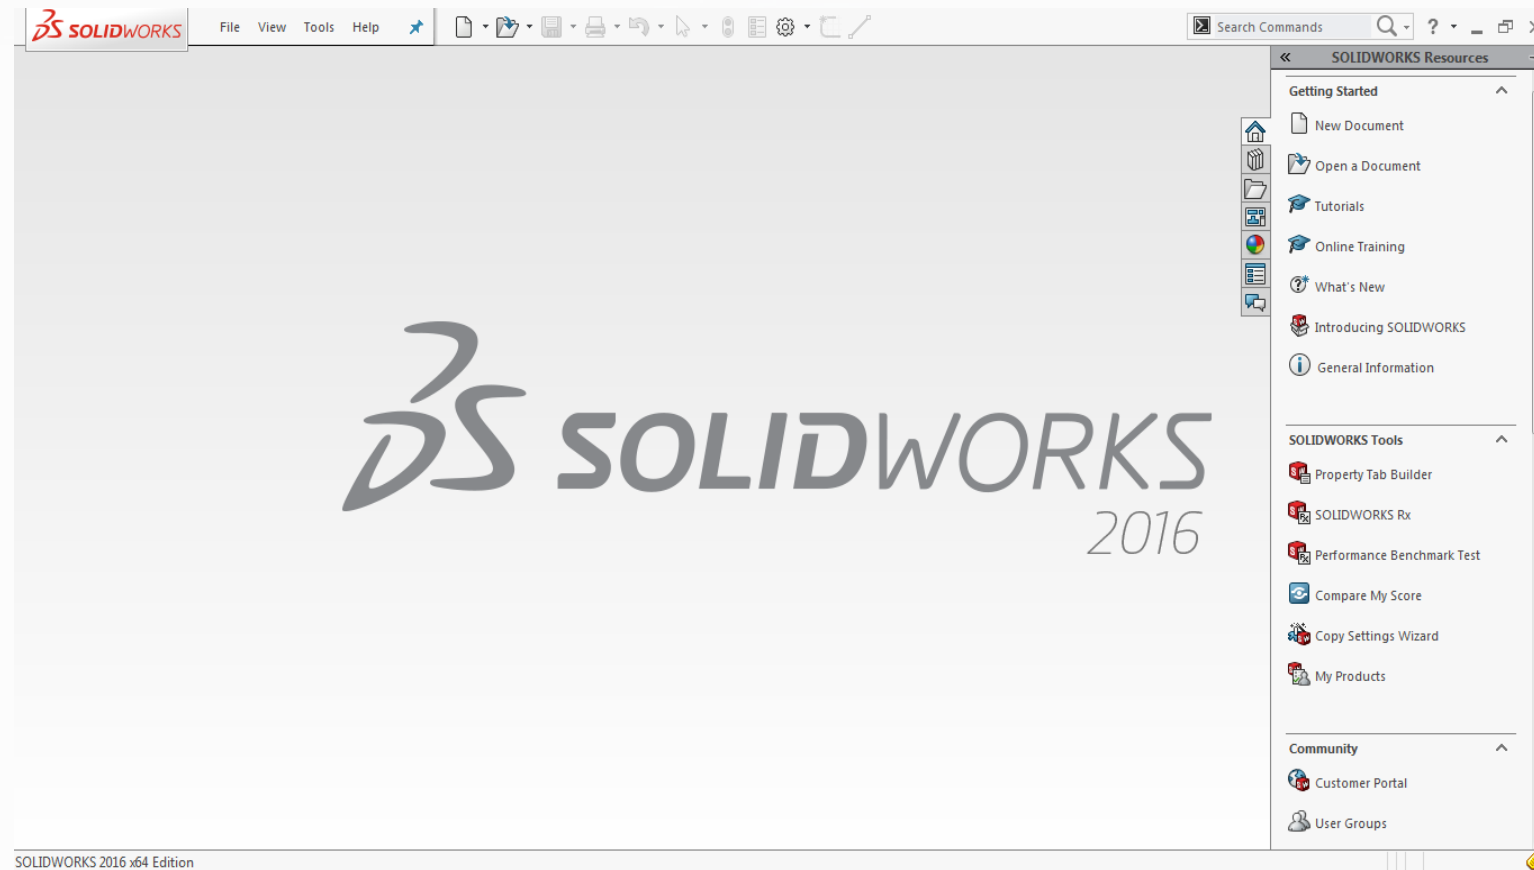

Figure 4 The **SOLIDWORKS** window

➤ TASK PANES

Figure 2-5 Various task panes in SOLIDWORKS

SOLIDWORKS Resources Task Pane

- Getting Started Rollout
- SOLIDWORKS tools Rollout
- Community Rollout
- Online Resources Rollout
- Subscription Services Rollout
- Tip of the Day Message Box

Design Library Task Pane

File Explorer Task Pane

View Palette Task Pane

Appearance, Scenes, and Decals Task Pane

Custom Properties

THE SKETCHING ENVIRONMENT

➤ STARTING A NEW DOCUMENT IN SOLIDWORKS 2015

- Part
- Assembly
- Drawing

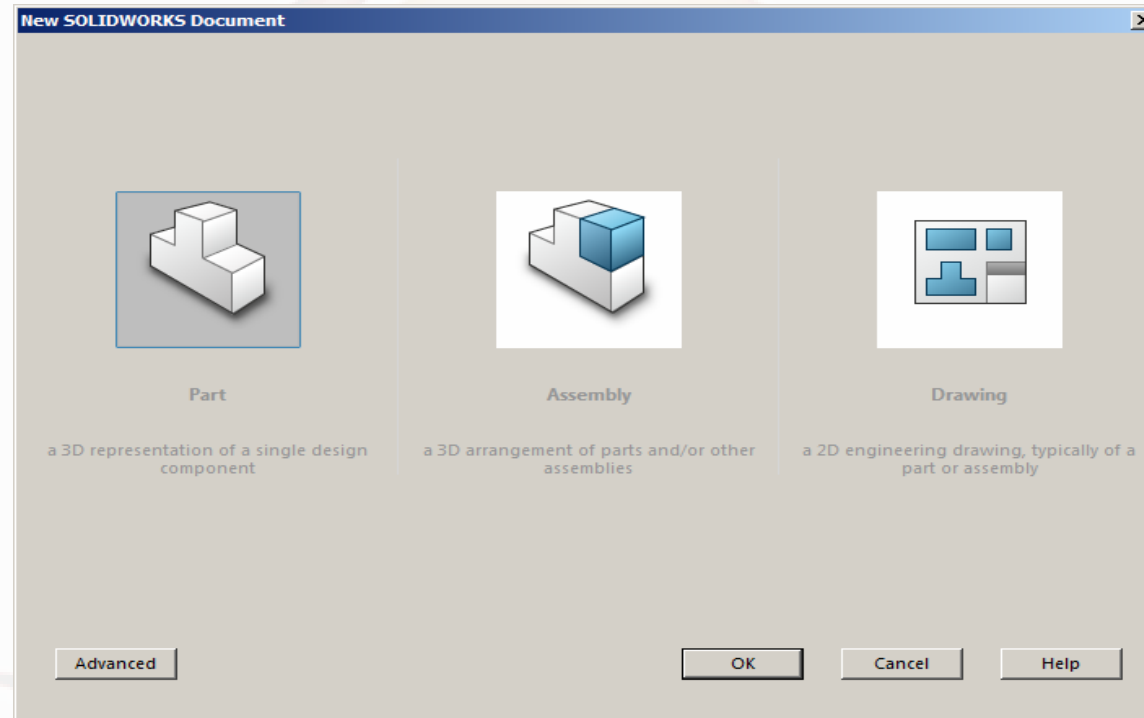

Figure 6 The **New SOLIDWORKS Document** dialog box

THE SKETCHING ENVIRONMENT

➤ UNDERSTANDING THE SKETCHING ENVIRONMENT

Figure 7 shows the **Sketch** tool in the Menu Bar of SOLIDWORKS 2015

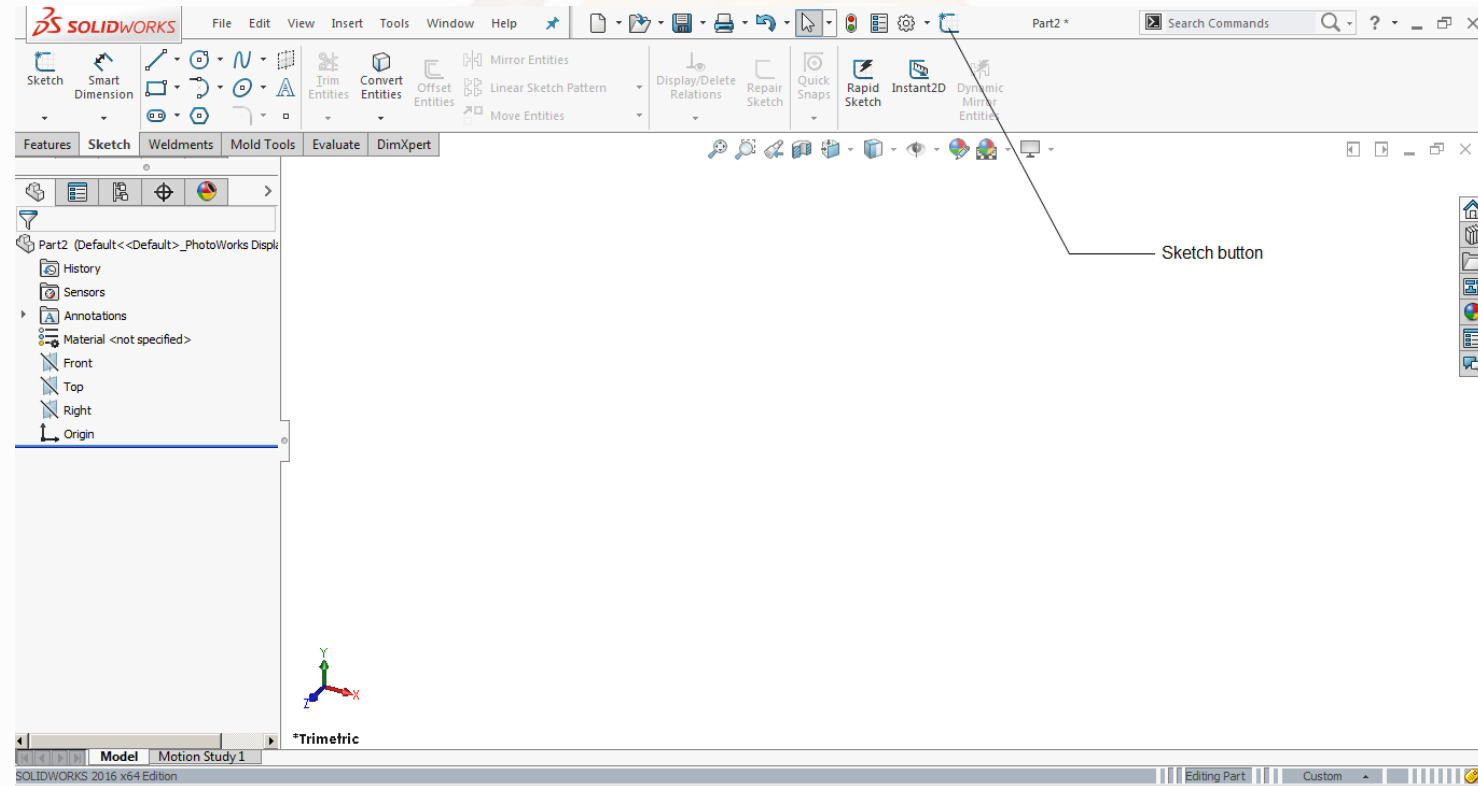

Figure 7 The **Sketch** tool in the Menu Bar of SOLIDWORKS 2016

THE SKETCHING ENVIRONMENT

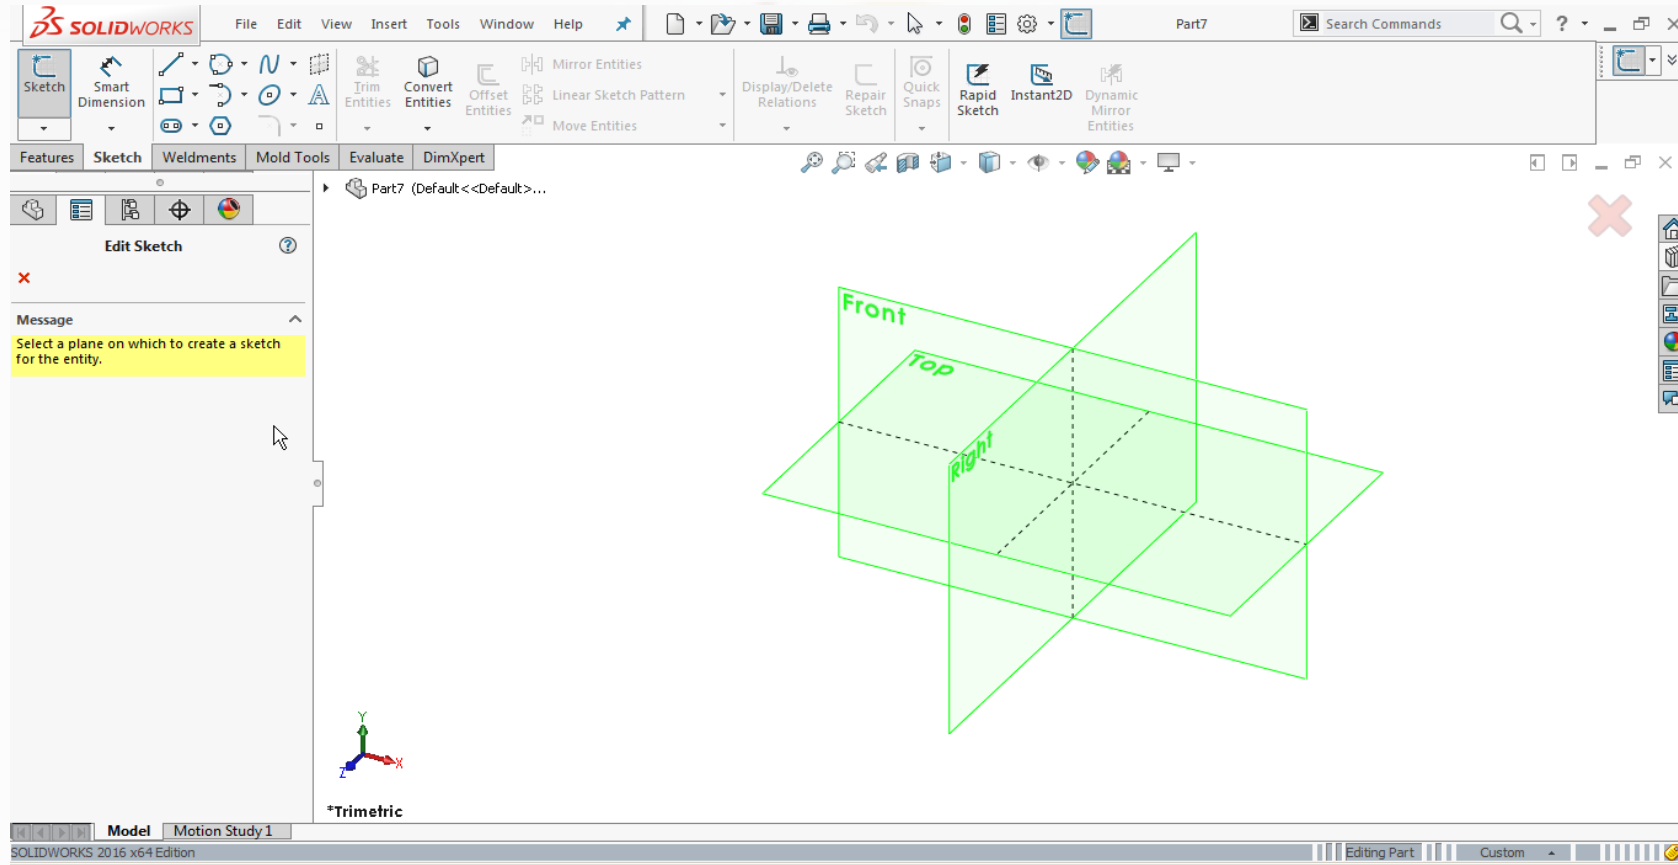

Figure 8 The three default planes displayed on the screen

THE SKETCHING ENVIRONMENT

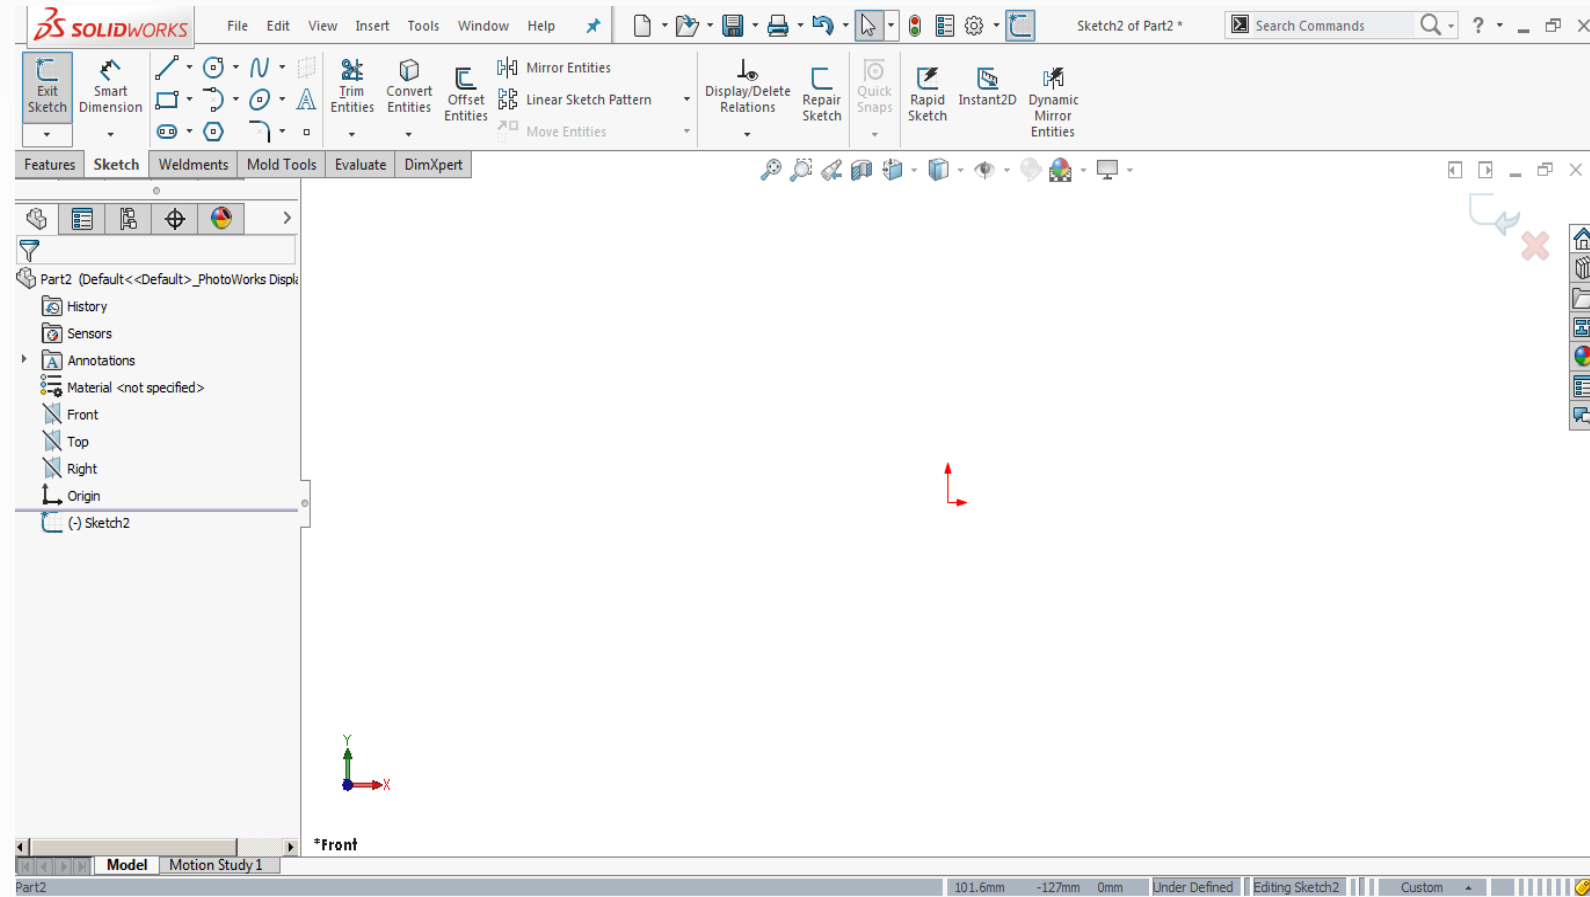

Figure 9 Default screen display of a part document in the sketching environment

➤ SETTING THE DOCUMENT OPTIONS

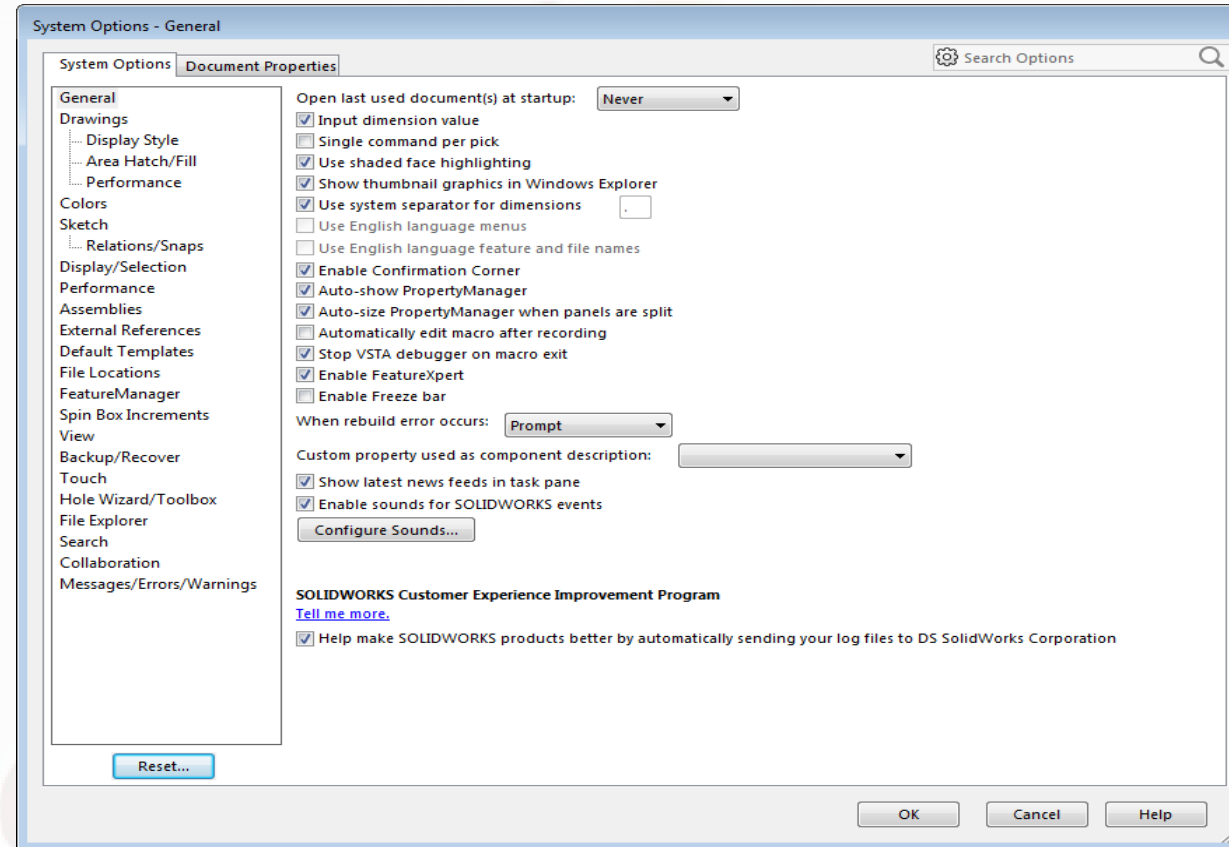

Figure 10 The **System Options - General** dialog box

THE SKETCHING ENVIRONMENT

- Modifying the Drafting Standards
- Modifying the Linear and Angular Units

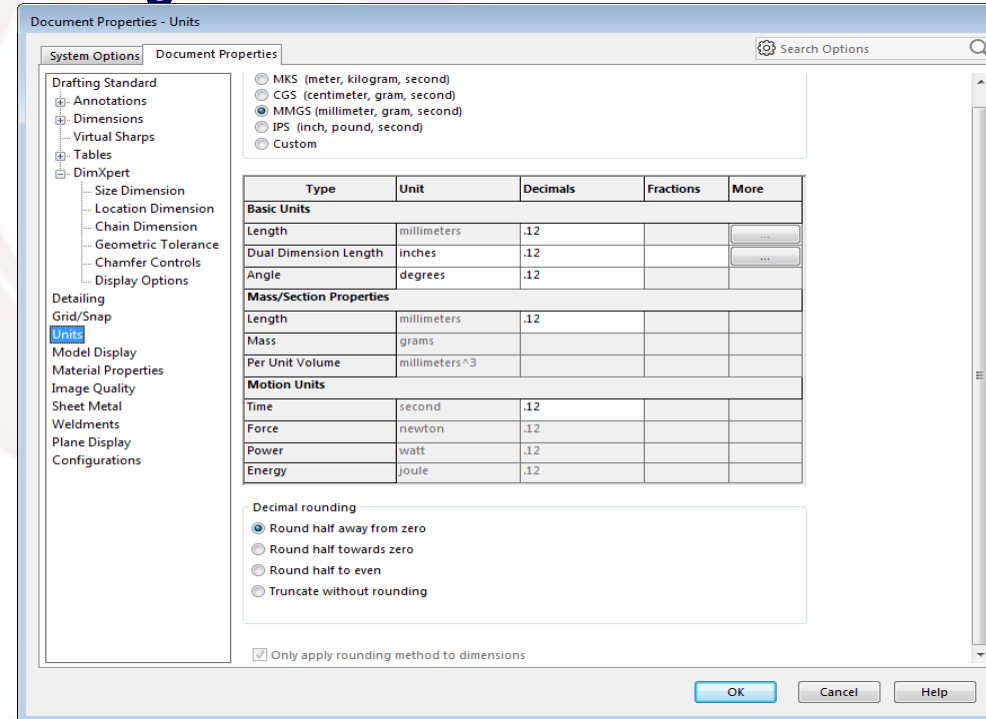

Figure 11 Setting the dimensioning standards

Figure 12 Flyout displayed after choosing the **Unit system** button

- **Modifying the Snap and Grid Settings**

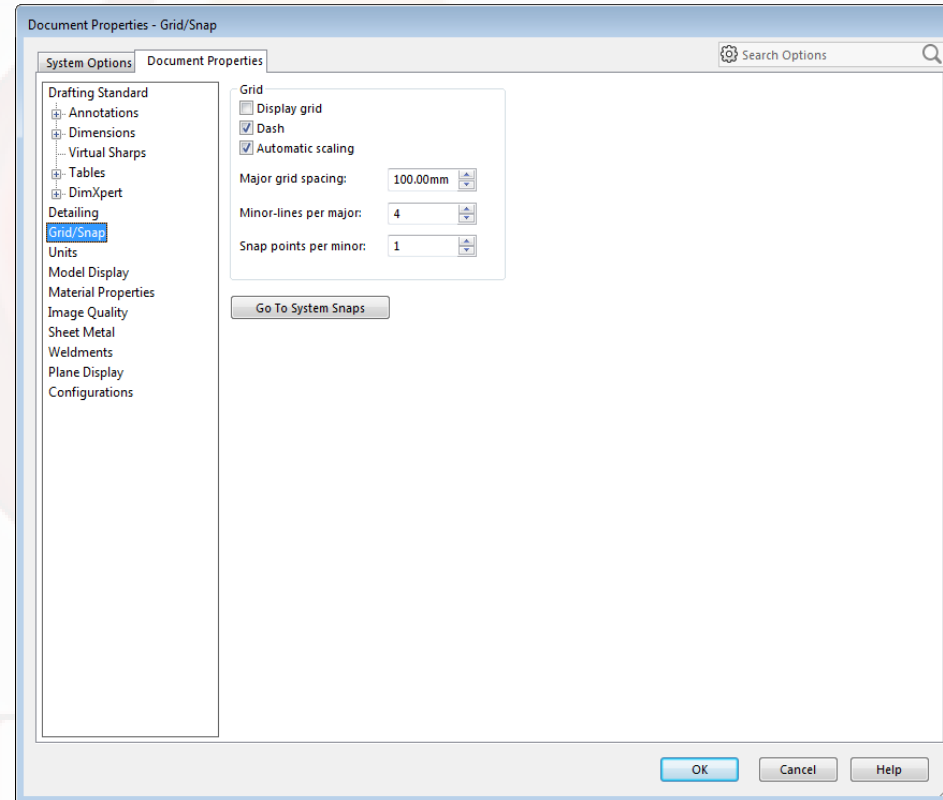

Figure 13 The **Document Properties - Grid/Snap** dialog box

➤ LEARNING SKETCHER TERMS

- Origin
- Inferencing Lines

Figure 14 Using inferencing lines to locate a point

Figure 15 Using inferencing lines to locate the center of a circle

- **Select Tool**

SOLIDWORKS menus: Tools > Select

- **Selecting Entities Using the Box Selection**
- **Selecting Entities Using the Cross Selection**
- **Selecting Entities Using the Lasso Selection**
- **Selecting Entities Using the SHIFT and CTRL Keys**
- **Invert Selection Tool**

SOLIDWORKS menus: Tools > Invert Selection

Toolbar: Selection Filter > Invert Selection

➤ DRAWING LINES

Command Manager:

SOLIDWORKS menus:

Toolbar:

Sketch > Line

Tools > Sketch Entities > Line

Sketch > Line

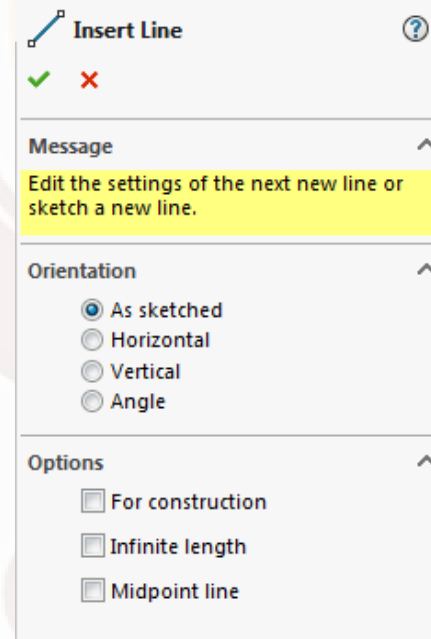

Figure 16 The **Insert Line PropertyManager**

- Orientation Rollout
- Options Rollout
 - Drawing a Chain of Continuous Lines

Figure 17 Sketch drawn using continuous lines

- Drawing Individual Lines

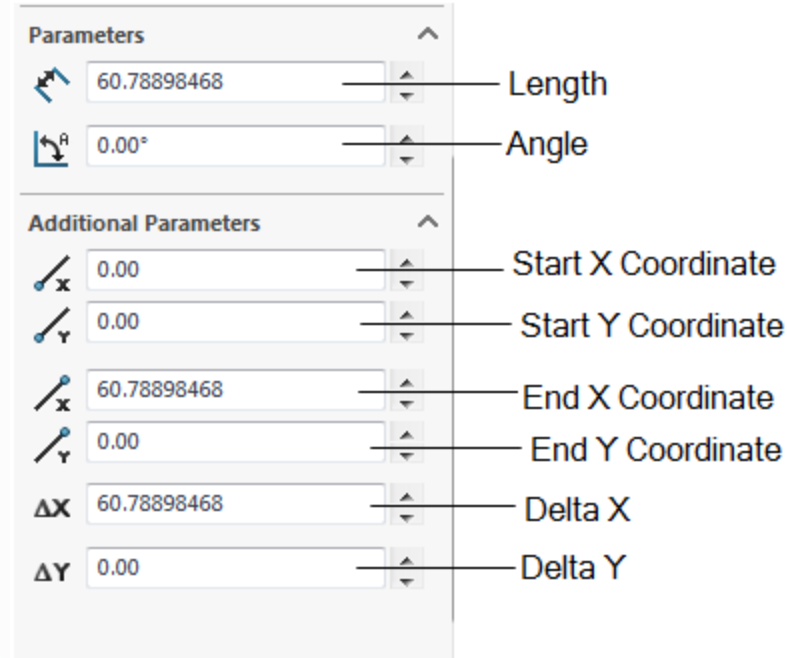

Figure 18 Partial view of the **Line Properties PropertyManager**

- Line Cursor Parameters

Figure 19 The length of the line displayed on the screen while drawing the line

Figure 20 Symbol of the **Vertical** relation

Figure 21 Symbol of the **Horizontal** relation

- Drawing Tangent or Normal Arcs Using the Line Tool

Figure 22 Drawing a tangent arc using the **Line** tool

Figure 23 Drawing a normal arc using the **Line** tool

- Drawing Construction Lines or Centerlines

Command Manager:

SOLIDWORKS menus:

Toolbar:

Sketch > Line flyout > Centerline

Tools > Sketch Entities > Centerline

Sketch > Line flyout > Centerline

- **Drawing Midpoint Line**

Command Manager:

Sketch > Line flyout > Midpoint Line

SOLIDWORKS menus:

Tools > Sketch Entities > Midpoint Line

Toolbar:

Sketch > Line flyout > Midpoint Line

- **Drawing the Lines of Infinite Length**

➤ DRAWING CIRCLES

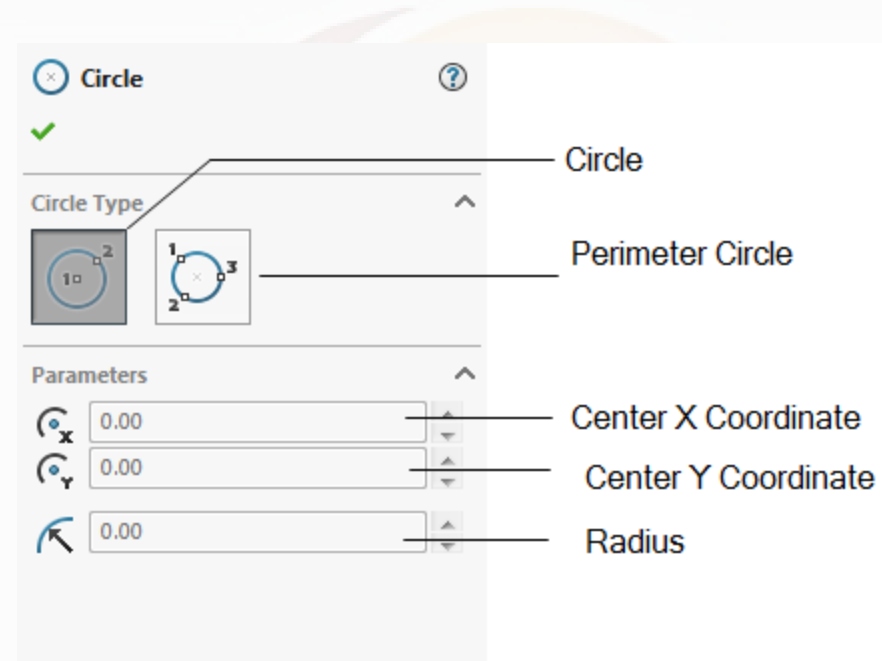

Figure 24 The Circle PropertyManager

- **Drawing Circles by Defining Their Center Points**

Command Manager: Sketch > Circle flyout > Circle
SOLIDWORKS menus : Tools > Sketch Entities > Circle
Toolbar: Sketch > Circle

Figure 25 Drawing a circle by specifying the centerpoint

- **Drawing Circles by Defining Three Points**

Command Manager: Sketch > Circle flyout > Perimeter Circle
SOLIDWORKS menus: Tools > Sketch Entities > Perimeter Circle
Toolbar: Sketch > Circle flyout > Perimeter Circle

Figure 26 Drawing a circle by specifying three points

- **Drawing Construction Circles**

➤ DRAWING ARCS

• Drawing Tangent/Normal Arcs

Command Manager: Sketch > Arc flyout > Tangent Arc
SOLIDWORKS menus: Tools > Sketch Entities > Tangent Arc
Toolbar: Sketch > Arc flyout > Tangent Arc

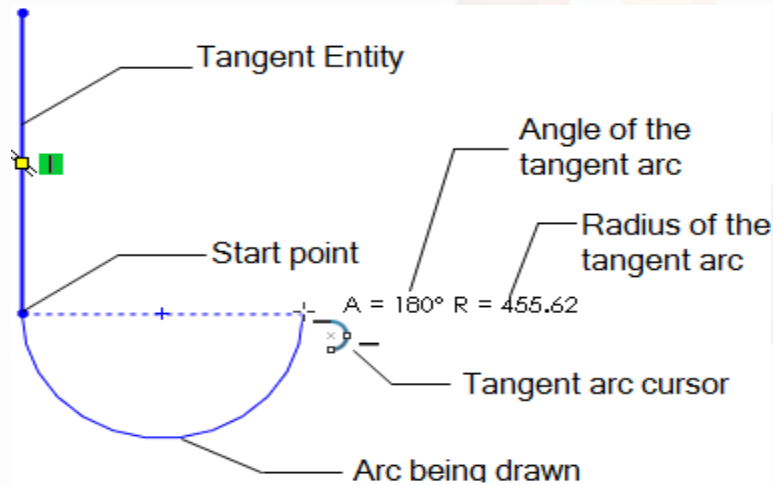

Figure 27 Drawing a tangent arc

Figure 28 Drawing a normal arc

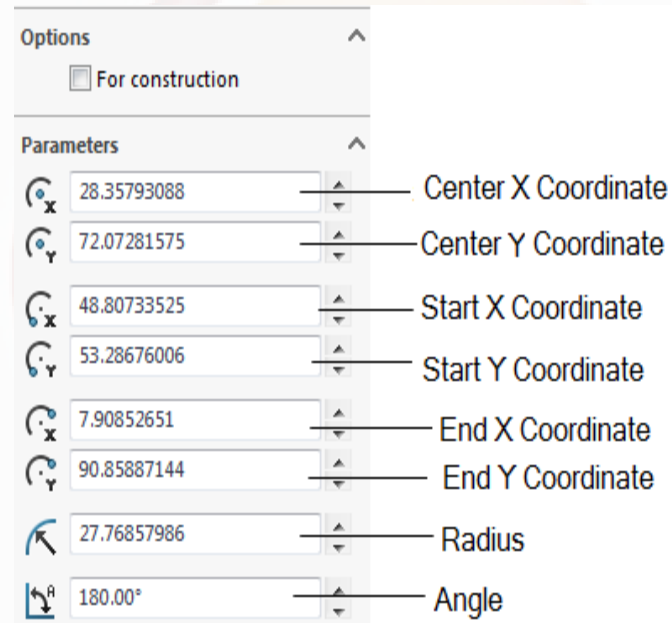

Figure 29 Partial view of the **Arc PropertyManager**

- **Drawing Centerpoint Arcs**

Command Manager: Sketch > Arc flyout > Centerpoint Arc
SOLIDWORKS menus: Tools > Sketch Entity > Centerpoint Arc
Toolbar: Sketch > Arc flyout > Centerpoint Arc

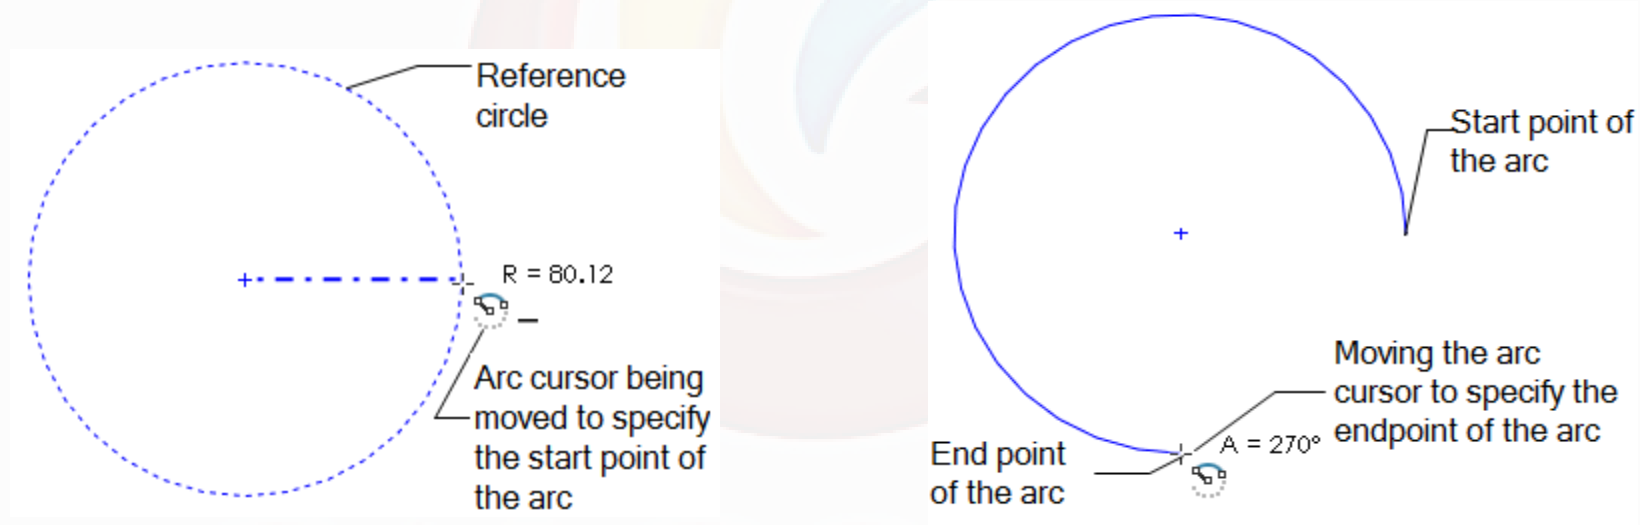

Figure 30 Specifying the Centerpoint and the start point of the Centerpoint arc

Figure 31 Moving the cursor to specify the start point and the endpoint of the arc

- **Drawing 3 Point Arcs**

Command Manager:

Sketch > Arc flyout > 3 Point Arc

SOLIDWORKS menus:

Tools > Sketch Entities > 3 Point Arc

Toolbar:

Sketch > Arc flyout > 3 Point Arc

Figure 32 Specifying the start point and the endpoint of the arc

Figure 33 Specifying the third point for drawing the arc

➤ DRAWING RECTANGLES

Tools that are used to draw rectangles are grouped together

• Drawing Rectangles by Specifying Their Corners

Command Manager: Sketch > Rectangle flyout > Corner Rectangle

SOLIDWORKS menus: Tools > Sketch Entities > Corner Rectangle

Toolbar: Sketch > Rectangle flyout > Corner Rectangle

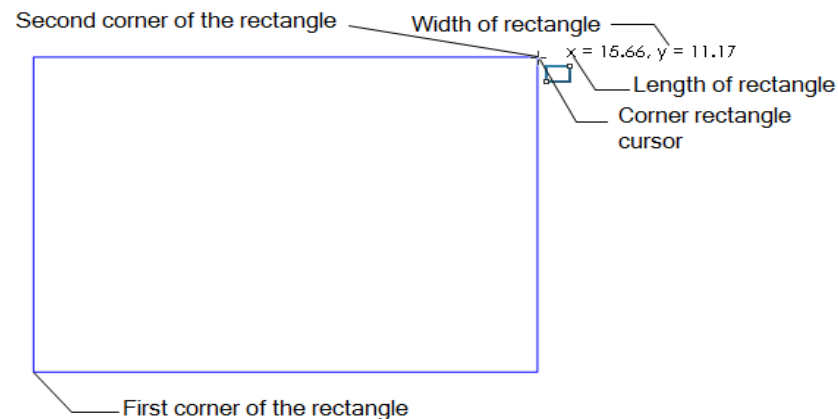

Figure 34 Drawing a rectangle by specifying two diagonally opposite corners

THE SKETCHING ENVIRONMENT

- **Drawing Rectangles by Specifying the Center and a Corner**

Command Manager: Sketch > Rectangle flyout > Center Rectangle
SOLIDWORKS menus: Tools > Sketch Entities > Center Rectangle
Toolbar: Sketch > Rectangle flyout > Center Rectangle

Figure 35 Drawing a rectangle by specifying the center and one of the corners

- **Drawing Rectangles at an Angle**

Command Manager: Sketch > Rectangle flyout > 3 Point Corner Rectangle

SOLIDWORKS menus: Tools > Sketch Entities > 3 Point Corner Rectangle

Toolbar: Sketch > Rectangle flyout > 3 Point Corner Rectangle

Figure 36 Drawing a rectangle at an angle

- Drawing Centerpoint Rectangles at an Angle

Command Manager: Sketch > Rectangle flyout > 3 Point Center Rectangle

SOLIDWORKS menus: Tools > Sketch Entities > 3 Point Center Rectangle

Toolbar: Sketch > Rectangle flyout > 3 Point Center Rectangle

Figure 37 Specifying the third point when the **From corners** radio button is selected

Figure 38 Specifying the third point when the **From Midpoints** radio button is selected

- **Drawing Parallelograms**

Command Manager: Sketch > Rectangle flyout > Parallelogram
SOLIDWORKS menus: Tools > Sketch Entities > Parallelogram
Toolbar: Sketch > Rectangle flyout > Parallelogram

Figure 39 Drawing a parallelogram

➤ DRAWING POLYGONS

Command Manager: Sketch > Polygon
SOLIDWORKS menus: Tools > Sketch Entities > Polygon
Toolbar: Sketch > Polygon

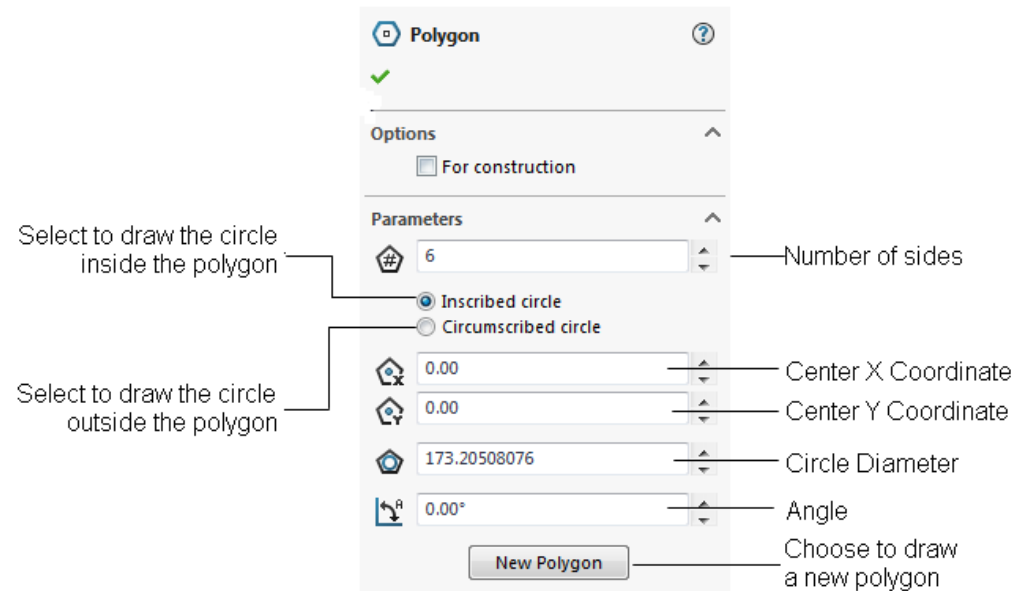

Figure 40 The Polygon PropertyManager

Figure 41 Six-sided polygon with the construction circle inscribed inside it

Figure 42 Five-sided polygon with the construction circle circumscribed about it

➤ DRAWING SPLINES

Command Manager: Sketch > Spline flyout > Spline
SOLIDWORKS menus: Tools > Sketch Entities > Spline
Toolbar: Sketch > Spline flyout > Spline

Figure 43 Spline with its start point at the origin

➤ DRAWING SLOTS

Various methods to create draw slots are discussed next

• Creating a Straight Slot

Command Manager: Sketch > Slot flyout > Straight Slot
SOLIDWORKS menus: Tools > Sketch Entities > Straight Slot
Toolbar: Sketch > Slot flyout > Straight Slot

Figure 44 Specifying points to create a straight slot

- **Creating a Centerpoint Straight Slot**

Command Manager: Sketch > Slot flyout > Centerpoint Straight Slot

SOLIDWORKS menus: Tools > Sketch Entities > Centerpoint Straight Slot

Toolbar: Sketch > Slot flyout > Centerpoint Straight Slot

Figure 45 Specifying points to create a centerpoint straight slot

- **Creating a 3 Point Arc Slot**

Command Manager: Sketch > Slot flyout > 3 Point Arc Slot
SOLIDWORKS menus: Tools > Sketch Entities > 3 Point Arc Slot
Toolbar: Sketch > Slot flyout > 3 Point Arc Slot

Figure 46 Specifying points to create a 3 point arc slot

- **Creating a Centerpoint Arc Slot**

Command Manager: Sketch > Slot flyout > Centerpoint Arc Slot

SOLIDWORKS menus: Tools > Sketch Entities > Centerpoint Arc Slot

Toolbar: Sketch > Slot Slot > Centerpoint Arc Slot

Figure 47 Specifying points to create a centerpoint arc slot

➤ PLACING SKETCHED POINTS

Command Manager: Sketch > Point
SOLIDWORKS menus: Tools > Sketch Entities > Point
Toolbar: Sketch > Point

➤ DRAWING ELLIPSES

Command Manager: Sketch > Ellipse
SOLIDWORKS menus: Tools > Sketch Entities > Ellipse
Toolbar: Sketch > Ellipse

THE SKETCHING ENVIRONMENT

Figure 48 Dragging the cursor to define the ellipse axis

Figure 49 Defining the second axis of the ellipse

➤ DRAWING ELLIPTICAL ARCS

Command Manager:

Sketch > Ellipse flyout > Partial Ellipse

SOLIDWORKS menus:

Tools > Sketch Entities > Partial Ellipse

Toolbar:

Sketch > Ellipse flyout > Partial Ellipse

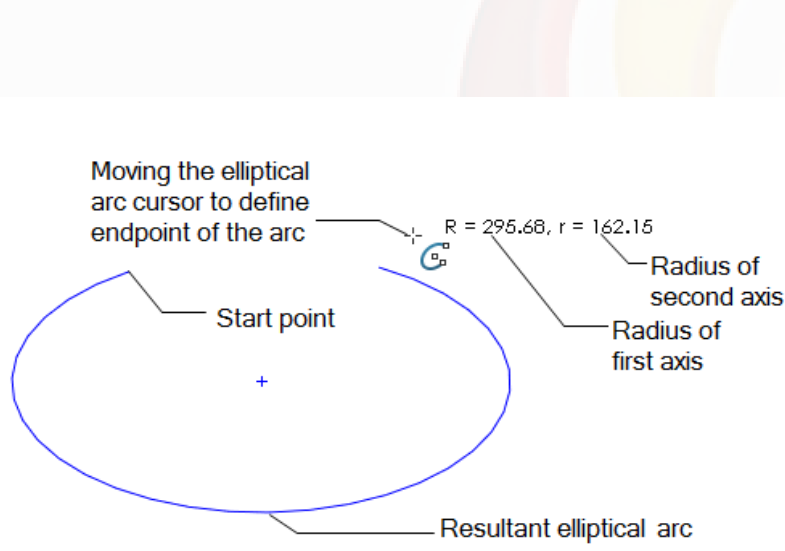

Figure 50 Drawing an elliptical arc

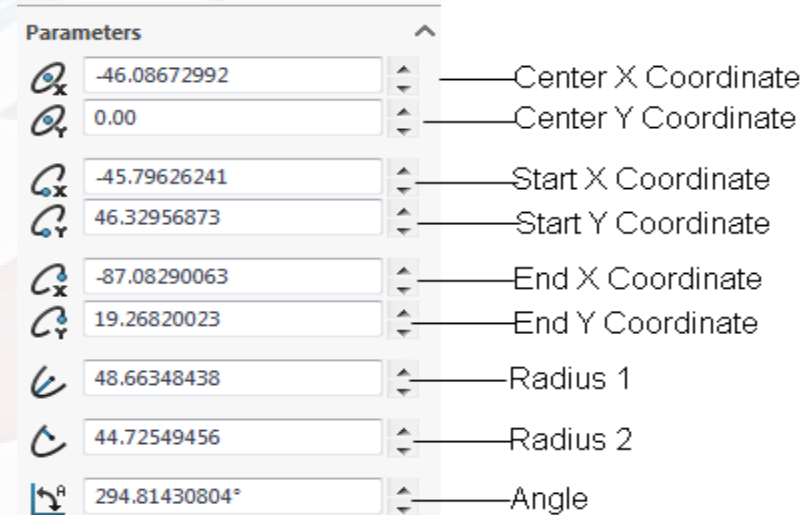

Figure 51 Partial view of the **Ellipse PropertyManager**

➤ DRAWING PARABOLIC CURVES

Command Manager: Sketch > Ellipse flyout > Parabola
SOLIDWORKS menus: Tools > Sketch Entities > Parabola
Toolbar: Sketch > Ellipse flyout > Parabola

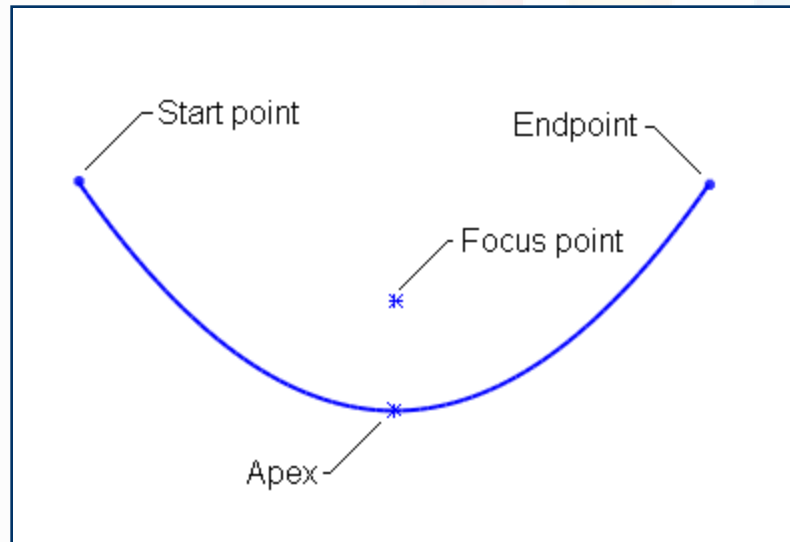

Figure 52 Parabola and its parameters

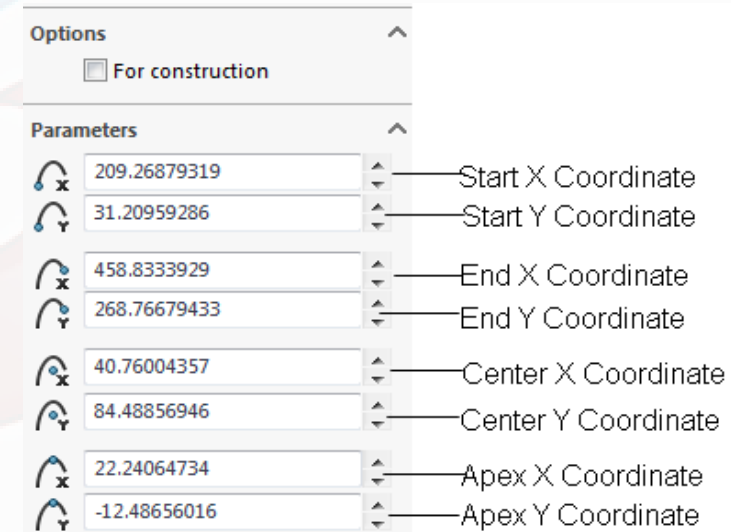

Figure 53 Partial view of the **Parabola PropertyManager**

➤ DRAWING CONIC CURVES

Command Manager:

SOLIDWORKS menus:

Toolbar:

Sketch > Ellipse flyout > Conic

Tools > Sketch Entities > Conic

Sketch > Ellipse flyout > Conic

Figure 54 Conic and its parameters

Parameters	
	-51.32520479
	-17.77339688
	-4.17893096
	56.68778163
	-54.01697466
	38.93940344
	-61.80215453
	44.71412478
	0.771360938
	13.61347271

Figure 55 The **Conic PropertyManager**

➤ DRAWING DISPLAY TOOLS

Allows you to modify the display of a drawing by zooming or panning it

- **Zoom to Fit**

View (Heads-Up):

Zoom to Fit

- **Zoom to Area**

View (Heads-Up):

Zoom to Area

- **Zoom In/Out**

SolidWorks menus:

View > Modify > Zoom In/Out

- **Zoom to Selection**

SOLIDWORKS menus: View > Modify > Zoom to Selection

- **Pan**

View (Heads-Up): Pan (Customize to Add)

- **Previous View**

View (Heads-Up): View > Previous View

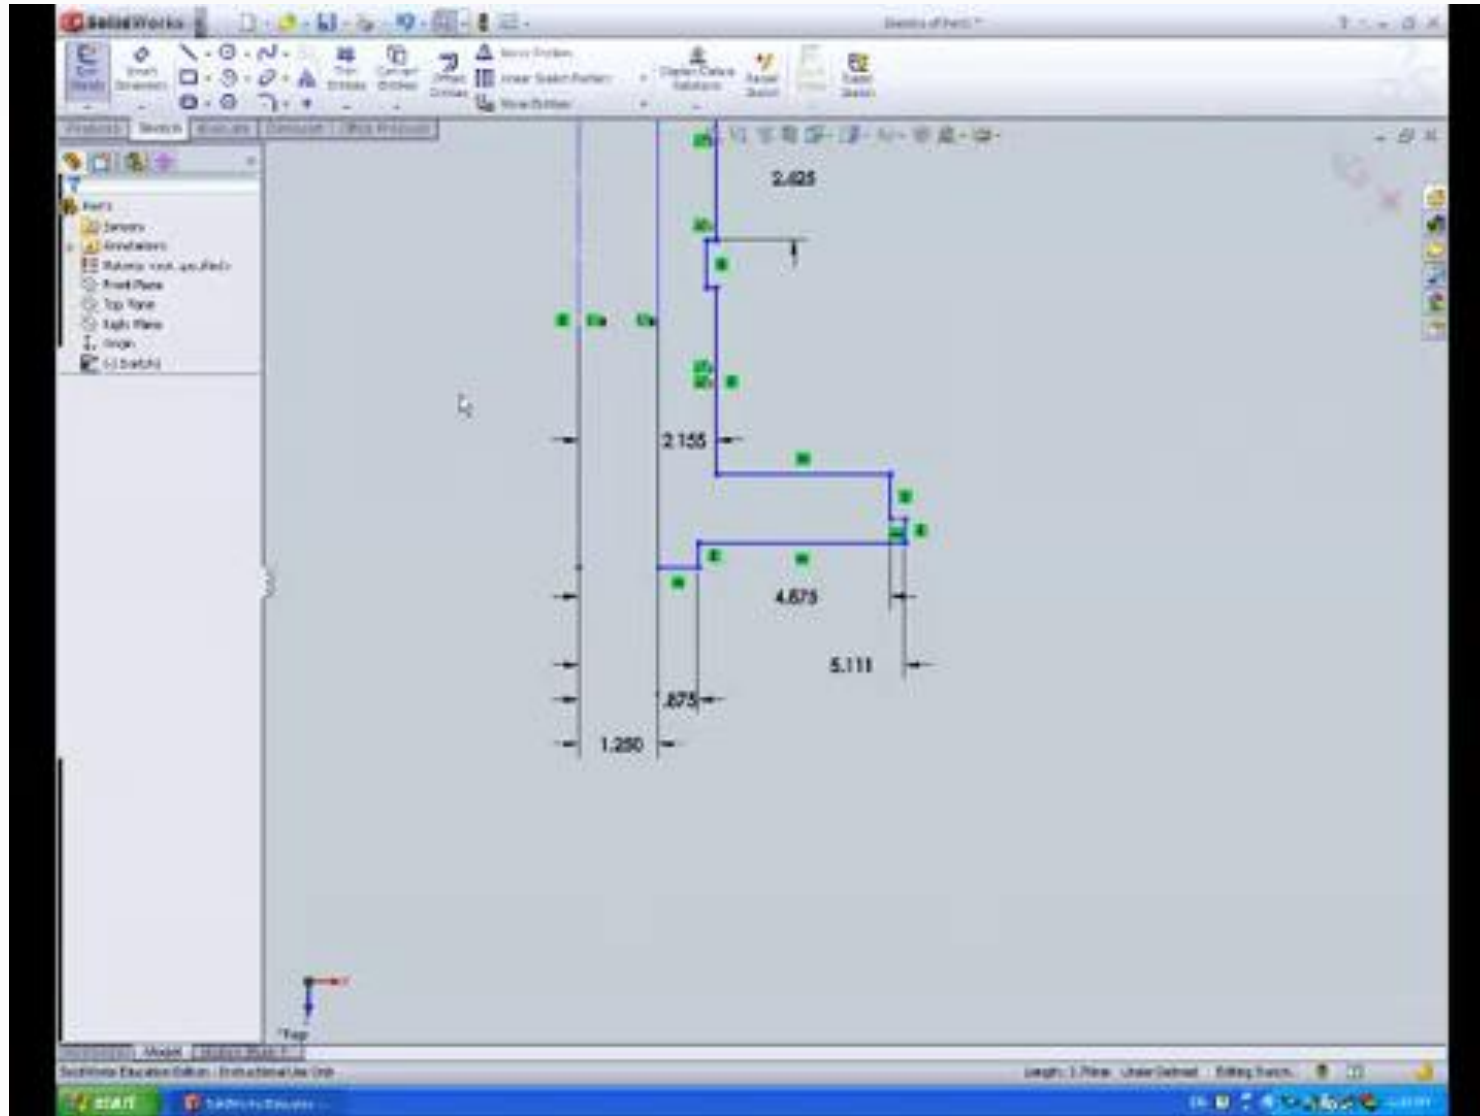

- **Redraw**

SOLIDWORKS menus: View > Redraw

➤ **DELETING SKETCHED ENTITIES**

Sketched entities can be deleted by selecting them using the Select tool and then pressing the DELETE key on the keyboard

➤ Tutorial 1

In this tutorial, you will draw the basic sketch of the revolved solid model shown in **Figure 56**. The sketch of this model is shown in **Figure 57**. Do not dimension the sketch. The solid model and its dimensions are given for your reference only.

(Expected time: 30 min)

Figure 56 Revolved solid model for Tutorial 1

Figure 57 Sketch for the revolved solid model

Tutorial for practice

The following steps are required to complete this tutorial:

1. Start a new part document.
2. Switch to the sketching environment, refer to **Figures 58** and **59**.

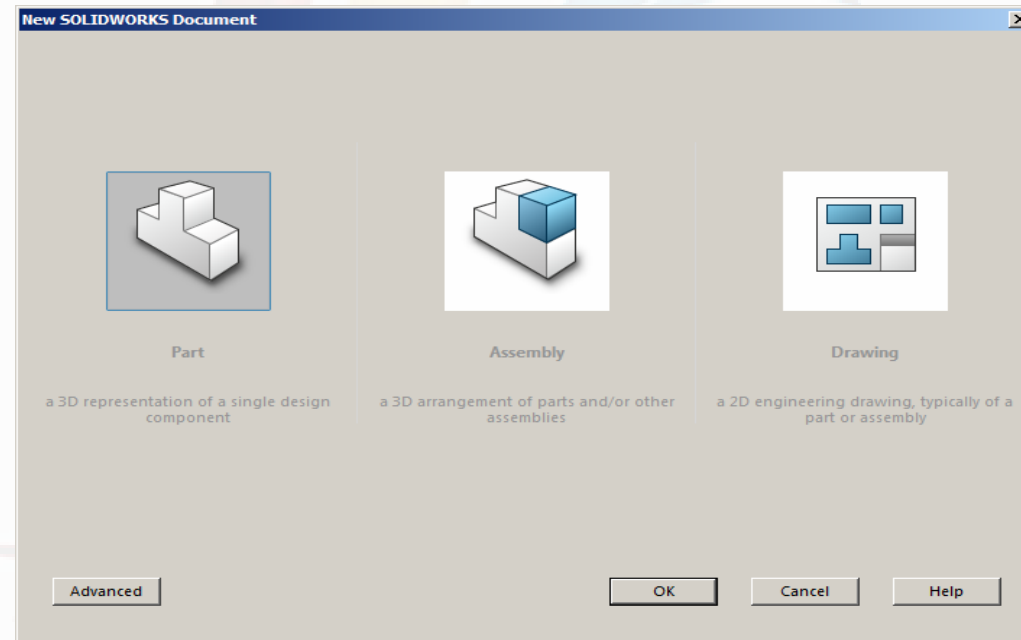

Figure 58 The **New SOLIDWORKS Document** dialog box

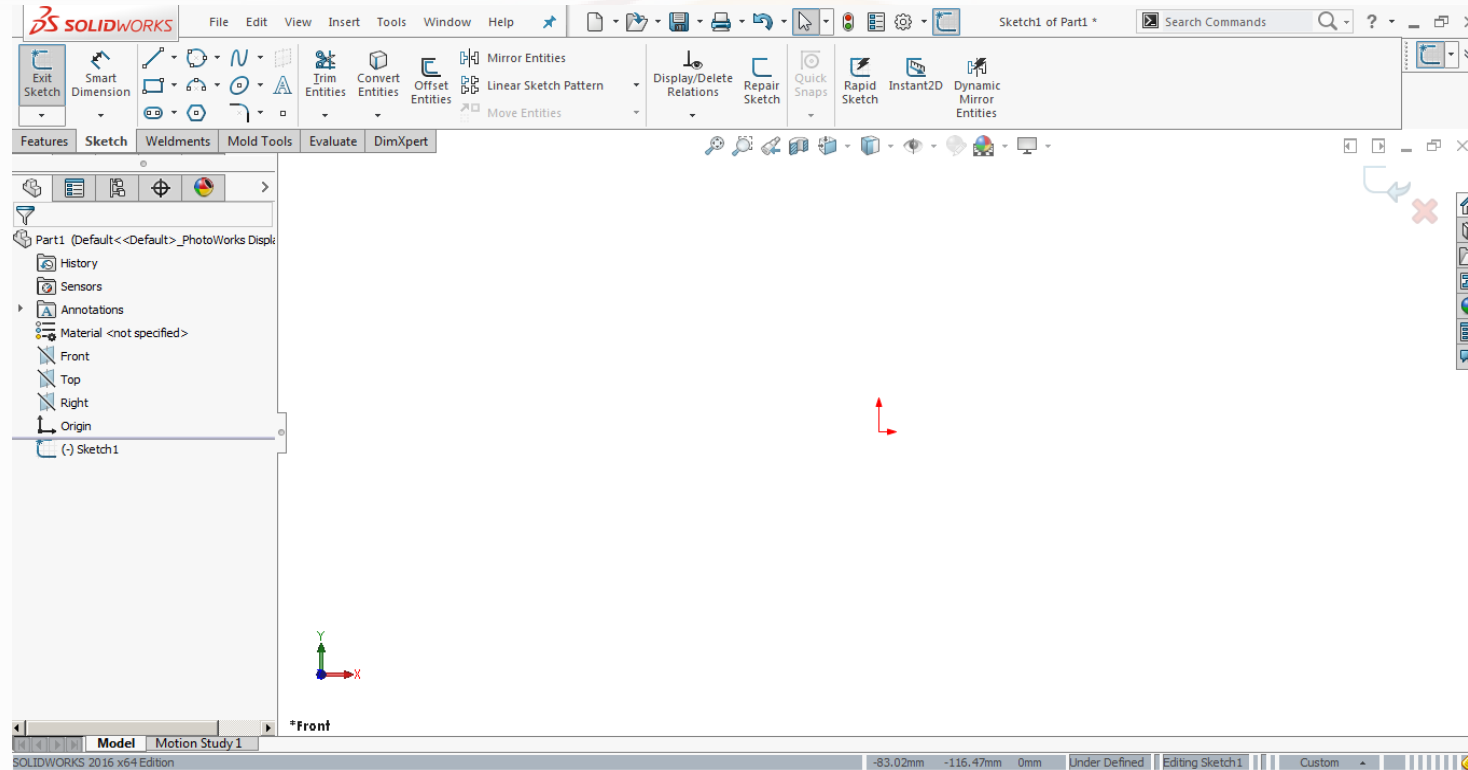

Figure 59 Screen display in the sketching environment

Tutorial for practice

3. Modify the settings of the snap and grid so that the cursor jumps through a distance of 5 mm instead of 10 mm.
4. Draw the sketch of the model using the **Line** tool, refer to **Figure 60**.

Figure 60 Final sketch for Tutorial 1

5. Save the sketch and then close the document.

➤ Tutorial 2

In this tutorial, you will draw the sketch of the solid model shown in **Figure 61**. The sketch of the model is shown in **Figure 62**. Do not dimension the sketch. The solid model and the dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 61 Solid model for Tutorial 2

Figure 62 Sketch for Tutorial 2

Tutorial for practice

The following steps are required to complete this tutorial:

1. Start SOLIDWORKS and then start a new part document.
2. Invoke the sketching environment.
3. Modify the settings of the snap and grid so that the cursor jumps through a distance of 5 mm instead of 10 mm.
4. Draw the sketch using the **Line** tool, refer to **Figure 63**.

Figure 63 Final sketch for Tutorial 2

5. Save the sketch and then close the file.

➤ Tutorial 3

In this tutorial, you will draw the basic sketch of the model shown in **Figure 64**. The sketch to be drawn is shown in **Figure 65**. Do not dimension the sketch; the solid model and its dimensions are given for your reference only.

(Expected time: 30 min)

Figure 64 Solid model for Tutorial 3

Figure 65 Sketch for Tutorial 3

Tutorial for practice

The following steps are required to complete this tutorial:

1. Start SOLIDWORKS and then start a new part file.
2. Invoke the sketching environment.
3. Modify the settings of the snap and grid so that the cursor jumps through a distance of 5 mm instead of 10 mm.
4. Draw the outer loop of the sketch by using the **Line** tool.

Tutorial for practice

5. Draw the inner circle using the **Circle** tool, refer to **Figure 66**.

Figure 66 Final sketch for Tutorial 3

6. Save the sketch and then close the file.

➤ Tutorial 4

In this tutorial, you will draw the sketch of the model shown in **Figure 67**. The sketch of the model is shown in **Figure 68**. Do not dimension the sketch. The solid model and the dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 67 Solid model for Tutorial 4

Figure 68 Sketch of the model for tutorial 4

Tutorial for practice

The following steps are required to complete this tutorial:

1. Start SOLIDWORKS and then start a new part document.
2. Switch to the sketching environment.
3. Draw the sketch of the model using the **Line** and **Circle** tools, refer to **Figures 69** through **73**.

Figure 69 Partial outer loop of the sketch

Tutorial for practice

Figure 70 Outer loop of the sketch

Figure 71 Drawing a circle with the help of inferencing lines

Figure 72 Sketch after drawing the two inner circles

Figure 73 Final sketch for Tutorial 4

4. Save the sketch and then close the document.

✚ Exercise 1

Draw the sketch of the model shown in **Figure 74**. The sketch to be drawn is shown in **Figure 75**. Do not dimension the sketch. The solid model and its dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 74 Solid model for Exercise 1

Figure 75 Sketch for Exercise 1

✦ Exercise 2

Draw the sketch of the model shown in **Figure 76**. The sketch to be drawn is shown in **Figure 76**. Do not dimension the sketch. The solid model and its dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 76 Solid model for Exercise 2

Figure 77 Sketch for Exercise 2

✦ Exercise 3

Draw the sketch of the model shown in **Figure 78**. The sketch to be drawn is shown in **Figure 79**. Do not dimension the sketch. The solid model and its dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 78 Solid model for Exercise 3

Figure 79 Sketch for Exercise 2

✦ Exercise 4

Draw the sketch of the model shown in **Figure 80**. The sketch to be drawn is shown in **Figure 81**. Do not dimension the sketch. The solid model and its dimensions are given for your reference only. **(Expected time: 30 min)**

Figure 80 Solid model for Exercise 3
